Now, SIP precious metals

If the sky-high prices of gold and silver have stood in the way of your acquiring these precious metals, here is a way out. Bullion India, jointly promoted by RiddiSiddhi Bullions and Finkurve Financial Services, is now offering a Unit Systematic Plan to help you regularly accumulate affordable quantities.

The USP is available online on Bullion India's website. Interested customers can register online and upload their KYC details. Customers can also register and apply for the plan through the agent and broker network of Bullion India. There are no registration charges. The minimum investment required is Rs 1,000, and the plan is available for tenures ranging from six months to 36 months.

At the end of the tenure, customers can redeem their units into physical gold and silver coins through the website. The option of door delivery across India or at the nearest delivery centres is available. The icing on the cake is that the customers can also sell back their gold and silver units on the online platform of Bullion India at the end of the tenure.
